

CONGESTION AT U.S. PORTS AND CHINESE PORT CLOSINGS CAUSE HUGE SHIPPING DELAYS, BUT US MELTBLOWN OFFERS A RELIABLE U.S. SOURCE OF MELTBLOWN POLYPROPYLENE FOR MASKS AND RESPIRATORS

It is becoming a very risky proposition to rely on an overseas supply chain for your meltblown filtering material needs. Uncertainty continues as the world struggles to mitigate the spread of COVID variants, and that continues to have an impact on the transportation industry.

American ports have gotten increasingly congested, with a record number of ships remaining anchored offshore and unable to unload their cargo. Container prices are climbing, and ports in China are closing due to COVID-19. Delays are substantial, no longer measured in days but in weeks. Containers that once cost \$5,000 are now soaring to \$25,000 each.

Experts are predicting that the present circumstances will get worse before they get better, and that they will likely last through all of 2022.

All of this puts your supply chain at risk for failure, just when you will need it the most.

It is time to secure your future and look to US Meltblown LLC to provide for your meltblown filtering needs. US Meltblown is your trusted source for this critical material. We stand behind our product, which is consistently meeting quality standards for ASTM F2100, Level 3 pleated surgical style masks and NIOSH N95 respirators. We have meltblown polypropylene in stock and ready to ship from our factory in Florida. Let's protect our citizens together with products proudly manufactured in America.

To secure your uninterrupted material supply for the rest of 2021 and into 2022, contact VP of Sales Ty Whitacre at twhitacre@usmeltblown.com/260-438-4491 or COO Chris Adamo at cadamo@usmeltblown.com/203-809-5296.

US Meltblown is America's trusted manufacturing source for critical filter material, setting the standard for this vital material used in personal protective equipment such as medical grade masks. We continue to fulfill our vision to protect families, healthcare workers, first responders, and workers in industry with American-made melt blown nonwoven polypropylene. US Meltblown is proud to provide this top quality critical filtering medium made in Florida from raw materials produced in the United States and processed on equipment that is built in the U.S. and operated by American workers. USMB polypropylene meets criteria for use in masks rated N95 and higher and is static charged to provide additional protection. Quality is assured through rigorous in-house testing. We sell by the master roll or slitted (175mm or 260mm). For more information, visit www.usmeltblown.com.
