

## **US Meltblown: The Source for PPE Material You Can Trust**

During these trying times, it's even more essential to be able to trust in the quality of personal protective equipment. Would you put your life into the hands of others that have everything to gain and nothing to lose by providing inferior masks? In order to trust the equipment, you must be able to trust the materials used to produce it and the Americans who stand behind the products they produce. We started US Meltblown to meet the dire need for reliable manufacturers of PPE materials. We produce top quality melt blown nonwoven polypropylene for use in medical grade PPE such as gowns and masks, right here in the United States.

What sets US Meltblown and our filtering material apart?

- An American manufacturer; our factory is in Fort Walton Beach, FL.
- A direct source: order straight from us, no potential for counterfeit product.
- All product undergoes rigorous lab testing; a Certificate of Quality and Conformance comes with each roll.
- Located in U.S. so no shipping delays and no container load minimums.
- Made from raw materials produced in the U.S.
- Processed on equipment that is designed, manufactured, and machined in the U.S. with advanced machining techniques used in domestic high tech industries.
- We produce, sell, and stand behind our product; we are just a phone call away.
- Factory runs 24/7/365 to produce max capacity.
- Sold by master roll or slitted (175mm or 260mm).
- You can order quantities from as little as one roll. We pay freight for single deliveries of one ton or more.
- You can request monthly, quarterly, and annual volumes.
- You can request delivery preferences.
- We care!

US Meltblown is America's trusted manufacturing source for critical filter material, setting the standard for this vital material used in personal protective equipment such as medical grade masks. The company's vision is to protect families, healthcare workers, first responders, and workers in industry with its American-made melt blown nonwoven polypropylene. US Meltblown is proud to provide this top quality critical filtering medium made in Florida from raw materials produced in the United States and processed on equipment that is built in the U.S. and operated by American workers. USMB polypropylene meets criteria for use in masks rated N95 and higher and is static charged to provide additional protection. Quality is assured through rigorous in-house testing. We sell by the master roll or slitted (175mm or 260mm).
