

BENEFIT NOW From Our OVERSTOCK Situation!

100% American-made Meltblown Non-woven Filter Material for Community Grade Masks Is Available and Ready to Ship Today at Discounted Prices

ASTM F3502 COMPLIANT * BERRY AMENDMENT COMPLIANT

US Meltblown LLC, your trusted source for 100% American-made meltblown polypropylene, is in an overstock situation! We have an excess of community mask grade material (ASTM F3502) available for cash and carry sales, deeply discounted below market prices. Take advantage of this short-term offer of non-medical grade meltblown as we make space for our ASTM F2100, Level 3, NIOSH-tested meltblown which is in hot demand right now.

Join other satisfied customers in the US Meltblown family to benefit from multiple advantages:

- This *is* a Berry Amendment compliant product, 100% American made:
 - Manufactured in Fort Walton Beach, Florida.
 - Produced from raw materials made in Houston, Texas.
 - We are the direct source: order straight from us, no potential for counterfeit product.
- We are a custom and contract manufacturer, which means:
 - We can make colored meltblown to avoid a white sheen through colored masks.
 - We can do various weights and custom slit to customer requirement
 - You can order as little as one slit roll, full master roll, by pallet or truckload.
- You can trust the quality: all product undergoes rigorous lab testing and a Certificate of Quality and Conformance comes with each delivery. We stand behind our meltblown and are always just a phone call away.
- No shipping delays, no container load minimums, no shipping minimums; we even pay freight for full truckloads! Stop tying up your funds with overseas orders and experience the ease and lower cost of ordering domestically made product.
- We produce meltblown that exceeds ASTM 2100 Level 3 and N95 NIOSH standards, as well as material that achieves MERV 13 ratings for HVAC use.

Seize this opportunity to get our high quality nonwoven material at low prices; contact us today to order:
